

# MPO Fiber Optic Cassette Kit

TiniFiber® introduces a pre-terminated fiber optic solution for fiber connectivity from the MDF to various IDFs within buildings.

TiniFiber® MPO cassette kit assemblies are available in single-mode or multi-mode applications. Proprietary Micro Armor Fiber™ cables are available in custom lengths from 100 ft. to 1,000 ft. in 12-port or 24-port configurations. **Rack-mount and wall-mount enclosures are in-stock and available for same day shipping.** Please ask about any special configurations or other fiber solutions you may need.

## Features

- Standard LGX footprint is compatible with most NEMA and rack-mount solutions
- High density connectivity
- No field termination or testing required
- No special tools or expertise required

## Benefits

- Fast and easy installations reduce labor costs
- Easy plug-and-play connectivity with pre-tested fiber optic connectors
- Certified test report provided with each kit.

## Specifications

- MPO Module Insertion Loss  $\leq 0.5\text{dB}$
- LC Connector Insertion Loss  $\leq 0.3\text{dB}$
- Cassette Material: Al with black powder coat finish
- Operating Temperature:  $-40^{\circ}\text{C} \pm 80^{\circ}\text{C}$
- Cassette Size: 105mm x 118.4mm
